

Call for Papers

The First International Conference DRSTET'20 on

« **Digital Revolution, Societal Transformations, and Epistemological Trajectories** »

April 16-17-18, 2020, Agadir, Morocco.

Digital revolution constitutes an unprecedented scientific breakthrough in the history of Mankind. As a rapidly advancing scientific process on the move, it simultaneously opens up rich promising possibilities and imposes an in-depth remapping and redefinition of the semantics of human existence. The locomotive of digital evolution is still forging new modes of being, creating new living conditions, charting new potential horizons, and critically shaking the fundamentally deep-seated conventional assumptions about knowledge, society, politics, economics, communication, industry, education, family, culture, arts, and aesthetics in ways that were heretofore unimaginable.

The first international conference on **Digital Revolution, Societal Transformations, and Epistemological Trajectories (DRSTET'20)** will be an excellent international forum for sharing knowledge about theoretical paradigms, innovative methodologies, and new applications of Digital Transformation. It will also probe into the implications of digital revolution and explore its profound impact on society, culture, epistemology, communication, business, and industry to mention just a few. The conference looks for significant contributions to all major fields of the Digital Transformation, in theoretical and practical aspects. The aim of the conference is to provide a platform for researchers and practitioners from both academia as well as industry to meet and share cutting-edge development in the field and to provide constructive debates on the multidimensional opportunities, challenges, and repercussions of digital information technologies on every single aspect of human life.

DRSTET'20 conference aims to bring together researchers, engineers, and practitioners interested in a wide range of issues related to Digital Revolution, Societal Transformations, and Epistemological trajectories. Original papers can be related- but not restricted to- one of the following areas of inquiry:

- **Society and Digital Humanities**
- **Epistemology and Knowledge in Digital Era.**
- **Digital Learning and Education.**
- **Social Media and Digital Marketing.**
- **Business and Digital Industry.**
- **Smart Cities and Digital Healthcare.**
- **Big Data, IoT and their societal applications.**
- **Artificial Intelligence and its societal applications.**
- **Privacy, Cybersecurity and Cybercrimes.**
